

256553 NETfinder

NETfinder is the newest generation of the LANTest family, with an advance circuit design surpassing the original technology. NETfinder is a perfect companion to network professionals and students, for commercial and residential applications. NETfinder is designed to enhance users' ability to quickly locate and verify the status of common and standard voice and data cables. It combines the functions of a convenient cable tester with a built-in low emission frequency "TONE" generator.

NETfinder is also equipped with **PORTfinder** functions to trace a cable back to the hub/switch. With NETfinder, cable tracing and testing is now **ONE** easy step.

Features:

- Tests for wiring faults of open, short, reversed and crossed
- Verification of shield integrity
- Specially designed remote unit that enables one person to test installed cables
- Built-in Portfinder function to trace ports back to switch
- Easy to read fault display and high speed testing
- Low battery indicator
- Tone Generator Features

Specification Data Sheet	
Manufacture #	256553
Power Source	DC 9V battery x 1pcs
Power Consumption	22mA
Operating Temp.	0°C~50°C
Storage Temp.	-10°C~60°C
Humidity	0 to 95%(non-condensing)
Dimension	104mm x 63mm x 29mm Remote 104mm x 30.5mm x 29mm
Safety Approve	CE
Approx. Weight	195g(Kit) / 45g(Remote)
