

256655Pro LANID Pro

LANID Pro is an essential tool for verifying and troubleshooting local area networks. It is designed for network administrators to quickly diagnose problems during LAN installation and repair. With a simple push of a button, the LANID Pro will display the status of network devices, whether it is running a 10BASE-T or 100BASE-T network. Furthermore, the LANID Pro is equipped with **Portfinder** function to quickly identify the corresponding port location on the Switch/Hub. The compact design provides the user with optimum convenience and portability.

LANID Pro is equipped with **Portfinder** function, which helps easily locate the workstations and corresponding ports on the switch/hub. It is great for the wall plates that are labeled incorrectly.

Auto negotiation:

- 100BASE-Tx full duplex
- 100BASE-Tx half duplex
- 10BASE-Tx full duplex
- 10BASE-Tx half duplex
- 100BASE-T4

LANID Pro can provide:

- Whether the link is up or not
- Whether the device is transmitting a packet or not
- Whether the device is working in full duplex mode or half duplex mode
- Whether the device is operating in 100BASE-Tx, 10BASE-Tx or 100BASE-T4 mode
- Whether a data transmission error has occurred
- Locate the workstations and corresponding ports on the switch/hub

Specification Data Sheet		
Manufacture #	256655Pro	256655
Portfinder Features	yes	no
Power Source	DC 3V(AAA x 2pcs)	
Power Consumption	235mA	
Operating Temp.	0°C~50°C	
Storage Temp.	-10°C~60°C	
Humidity	0 to 95%(non-condensing)	
Dimension	215mm x 37mm x 35mm	
Safety Approve	CE	
Approx. Weight	105g
