

## 256800 GIGA-X Network On-line Status Tester

GIGA-X is an economical and versatile tool. It helps NEW network administrators and installers to layout 10/100/1000BASE-T network environments. GIGA-X also allows for trouble-free deployment of new Switch/NIC Ethernet network devices for business expansion. Network installers and administrators will find that GIGA-X is the fastest yet simplest unit to detect, identify, and maintain their network environments. GIGA-X complies with existing IEEE standards.

### Features:

- Maps any existing network layout quickly
- Identifies 100/100/1000BASE-T or BASE-Tx
- Testing while network is Online or Offline
- Measure cable length by each pair
- Test cable open/short at the same time.
- Battery operated, compact and easy to use

Specifications	
Manufacture #	256800
Display results in	LED & Alphanumeric LED
Connector Type	RJ45
Accuracy	± 1m (3.28 feet)
Approximate test range	On-line 110m (360.89 feet) Off-line 150m (492.13 feet)
Operating Temperature	0°C -50°C (32°F -122°F)
Storage Temperature	-30°C -50°C (-22°F -122°F)
Humidity	10% -90%
Dimensions	82 x 138 x 32 mm (3.2 x 5.4 x 1.3 inches)
Power Source	4 x AAA Alkaline Batteries
Battery Life	Good for ± 800 test cycles
Weight	130.4g
Approved by	CE
